

As a creatively challenging technical group

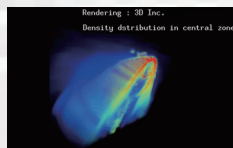

Day by day the environment is changing dynamically.

The dramatic growth of IT which can be called as a “Revolution” created more opportunities and produce new solutions in sequence adding much value to our life.

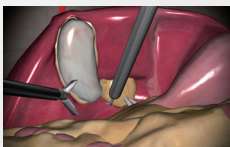

As the company name suggests, we specialize in 3D image processing and real time visualization technologies. Through these technologies we contribute to HMI (Human Machine Interface) development that interact people with various information systems.

We continue R&D to address the issues and challenge the advance requirements from our valued customers and provide multidimensional solutions to deal with three dimensional contents. Thank you for your continued business with us.
